# Medicinal use of the *Dadima* (Pomegranate) fruit in Ayurveda: A comprehensive review

Vivek Kumar Patel<sup>1</sup>, Rabinarayan Acharya<sup>2</sup>

## Abstract

*Ayurveda* describes *Ahara* (food) as the best preventive medicine and considered *Mahabhaishajya*, the superior medicine in *Ayurveda*. *Dadima* (*Punica granatum L.*) of family Lytheraceae is listed among the fruits in the *Phala* category, which is a type of *Ahara Varga*, and is recommended both as an *Ahara* and as *Aushadha* (medicine) for various health conditions. Use of *Dadima* as an *Aushadha* in 530 formulations with indications and a detailed review on the use of *Dadima* in *Ahara Kalpana* (dietetic preparations) mentioned in *Ayurveda* have already been reported. We aimed to review and compile the 530 *Aushadha Kalpana* (medicinal formulations) of *Dadima*. The present study involves a comprehensive compilation and analysis of information related to *Dadima* (*Punica granatum L.*) and its therapeutic uses as documented in 8 *Samhita Grantha*, 23 *Nighantu* and 44 ayurvedic compendias. The therapeutic uses of *Dadima* were then systematically classified based on the *Srotasa* (channels or systems). Among 530 *Aushadha Kalpana* of *Dadima*, *Churna* (159) is found maximum dosages form. A maximum of 158 formulations have been indicated in diseases of *Annavaha Srotas*. Sixteen (16) formulations are indicated in general medical conditions. Twelve formulations are indicated for the management of *Urdhvajatrugata Vyadhi*. One formulation is indicated for its use as *Rasayana*, while eight formulations are indicated for use as *Vajikarana*. *Dadima*, has been used both as food as well as medicine, with a wide range of clinical indications proving it to be a potent nutraceutical.

## Keywords:

*Ahara, Aushadha, Ayurveda, Punica granatum, Srotas*

## Introduction

**A**yurveda, a holistic and comprehensive knowledge system, emphasizes positive health and addresses three major variables when dealing with health and disease: *Aushadha* (medication), *Ahara* (food), and *Vihara* (practices).<sup>[1]</sup> *Ahara* is considered paramount and is regarded as the foremost among the three subpillars of life, which also include *Nidra* (sleep) and *Brahmacharya* (celibacy).<sup>[2]</sup> *Ahara* not only maintains health but also prevents the emergence of future diseases,<sup>[3]</sup>

earning the designation of *Mahabhaishajya* (the ultimate medicine).<sup>[4]</sup> *Dadima* (pomegranate), scientifically known as *Punica granatum L.*, of the Lytheraceae family, is a fruit described under *Phala Varga* (group of fruits), a category of *Ahara Varga* (group of foods) referenced in Ayurvedic classics.<sup>[5]</sup> Traditionally, *Dadima* has been reported to be used in different parts of India and across the globe for its efficacy in treating 41 different disease conditions.<sup>[6]</sup>

Various Ayurvedic texts mention the use of *Dadima* both as *Ahara* and *Aushadha*.

**How to cite this article:** Patel VK, Acharya R. Medicinal use of the *Dadima* (Pomegranate) fruit in *Ayurveda*: A comprehensive review. J Drug Res Ayurvedic Sci 2024;9:S11-29.

*Dadima* has been recognized as a component in 103 *Ahara Kalpana* (dietary preparations) used for treating 31 different diseases.<sup>[7]</sup>

*Dadima* with its varieties, synonyms, pharmacological activities, and 530 *Aushadha Kalpana* (medicinal formulations) have been documented to be used in 80 various disease conditions, with the most commonly reported indication being *Atisara* (diarrhea).<sup>[8]</sup>

We have reported various aspects of *Dadima* as an *Ahara*, including the classification of its indications based on *srotas*. However, a similar classification for its use as an *Aushadha*, detailing the 530 formulations, dosage forms, and their uses, is still lacking.

Consequently, a comprehensive review has been undertaken to create a dedicated database categorizing the *Aushadha Kalpana* of *Dadima* and their indications, as specified in existing Ayurvedic pharmacopoeias and compendiums.

## Materials and Methods

### Search criteria

Information about *Dadima* and its medicinal formulations used in various disease conditions has been compiled from the printed form of *Nighantu*, *Samhita*, *Chikitsagrantha*, *Rasagrantha*, and the online source of e-*Nighantu* with the search word *Dadima* and its 32 synonyms such as *Dantabeeja*, *Atipatra*, *Madhubeeja*, *Lohitapushpaka*, and *Shukapriya*.<sup>[8]</sup> In this review, information from various treatise and compendias such as *Samhita Grantha*: *Charaka Samhita*,<sup>[9]</sup> *Sushruta Samhita*,<sup>[10]</sup> *Ashtanga Samgraha*,<sup>[11]</sup> *Ashtanga Hridaya*,<sup>[12]</sup> *Kashyapa Samhita*,<sup>[13]</sup> *Bhela Samhita*, and<sup>[14]</sup> *Harita Samhita*<sup>[15]</sup>; *Samgraha Grantha*, *Chikitsa grantha*, and *Rasa Grantha* such as *Bhavaprakasha*,<sup>[16]</sup> *Vrindamadhava*,<sup>[17]</sup> *Chakradutta*,<sup>[18]</sup> *Gadanigraha*,<sup>[19]</sup> *Vangasena*,<sup>[20]</sup> *Sharangdhara Samhita*,<sup>[21]</sup> *Yogaratnakara*,<sup>[22]</sup> *Bhaishajya Ratnavali*,<sup>[23]</sup> *Sahasra Yoga*,<sup>[24]</sup> *Kalyanakarakam*,<sup>[25]</sup> *Bharata Bhaishajya Ratnakara*,<sup>[26]</sup> *Siddhabhaiṣṭya Manimala*,<sup>[27]</sup> *Vaidya Ratnam*,<sup>[28]</sup> *Yoga Chintamani*,<sup>[29]</sup> *Vaidya Chintamani*,<sup>[30]</sup> *Basavarajiyam*,<sup>[31]</sup> *Vaidya Rahasya*,<sup>[32]</sup> *Anupana Manjari*,<sup>[33]</sup> *Rajamartanda*,<sup>[34]</sup> *Rasarnava Nama Rastantra*,<sup>[35]</sup> *Rasendra Chudamani*,<sup>[36]</sup> *Rasa Prakash Sudhakara*,<sup>[37]</sup> *Rasa Ratna Samucchaya*,<sup>[38]</sup> *Rasa Paddhati*,<sup>[39]</sup> *Ananda Kanda*,<sup>[40]</sup> *Rasa Chintamani*,<sup>[41]</sup> *Rasa Manjari*,<sup>[42]</sup> *Rasendra Chintamani*,<sup>[43]</sup> *Rasendra Sara Sangraha*,<sup>[44]</sup> *Rasa Kamadhenu*,<sup>[45]</sup> *Yoga Tarangini*,<sup>[46]</sup> *Ayurveda Prakasha*,<sup>[47]</sup> *Brihat Rasa Raja Sundara*,<sup>[48]</sup> *Rasa Raja Mahodadhi*,<sup>[49]</sup> *Rasa Jala Nidhi*,<sup>[50]</sup> *Rasayoga Sagara*,<sup>[51]</sup> *Rasopanishada*,<sup>[52]</sup> *Rasamrutam*,<sup>[53]</sup> *Rasendra Sambhava*,<sup>[54]</sup> *Abhinava Navajivana*,<sup>[55]</sup> *Rasa Sanketa Kalika*,<sup>[56]</sup> *Rasayana Sara*,<sup>[57]</sup> *Chikitsa Kalika*,<sup>[58]</sup> *Rasa Chandansu*,<sup>[59]</sup> *Vaidyaka Chamatkara Chintamani*,<sup>[60]</sup> *Nighantu Adarsha*,<sup>[61]</sup> *Ashtanga Nighantu*,<sup>[62]</sup> *Paryayaratnamala*,<sup>[63]</sup> *Dhanavanatari Nighantu*,<sup>[64]</sup> *Shabda chandrika*,<sup>[65]</sup> *Shodhala Nighantu*,<sup>[66]</sup> *Nighantusheśa*,<sup>[67]</sup>

*Madhava Dravyaguna*,<sup>[68]</sup> *Hridayadipaka Nighantu*,<sup>[69]</sup> *Madanapala Nighantu*,<sup>[70]</sup> *Kaiyadeva Nighantu*,<sup>[71]</sup> *Sarasavati Nighantu*,<sup>[72]</sup> *Bhavaprakasha Nighantu*,<sup>[73]</sup> *Raja Nighantu*,<sup>[74]</sup> *Shivakosha Nighantu*,<sup>[75]</sup> *Rajavallabha Nighantu*,<sup>[76]</sup> *Shaligrama Nighantu*,<sup>[77]</sup> *Madanadi Nighantu*,<sup>[78]</sup> *Saushruta Nighantu*,<sup>[79]</sup> *Siddhamantra*,<sup>[80]</sup> *Paryayamuktavali*,<sup>[81]</sup> *Laghu Nighantu*, and<sup>[82]</sup> *Dravyaguna Sangraha*<sup>[83]</sup> has been compiled.

Formulations containing *Dadima* or its components as an ingredient were thoroughly investigated and documented in a specifically constructed data sheet. To keep the presentation brief, multiple abbreviations were generated for different dose forms such as *Anjana* (collyrium) (An), *Asava* (As), *Arishta* (Ar), *Avaloha* (confection) (Al), *Churna* (powder) (Cr), *Dhooma* (fumigation) (Dm), *Ghrita* (medicated ghee) (Gr), *Guggulu* (Gu), *Kalka* (paste) (Kl), *Kvatha* (decoction) (Kv), *Leha* (Lh), *Lepa* (Paste) (Lp), *Masi* (Ms), *Rasa Kalpana* (Rk) (mercurial preparation), *Sneha* (oil preparation) (Sn), *Svarasa* (juice) (Sv), *Taila* (oil) (Tl), *Vati* (pills) (Vt), and *Varti* (wick) (Vr).

The NAMASTE Portal<sup>[84]</sup> was used to interpret classical Ayurvedic terminologies and their nearest English equivalents, and any terms that were not available were sourced from conventional dictionaries<sup>[85]</sup> and the Ayurveda Formulary of India.<sup>[86]</sup> Internal and external administrations were classified based on their *Srotas* of origin,<sup>[87]</sup> indicated in *Urdhvajatrugata Vyadhi* (diseases of head and neck), *Rasayana* (rejuvenation), and *Vajikarana* (aphrodisiac). Diseases that could not be classified according to *srotas* have been categorized under *Samanya Sansthanika Vyadhi* (general medical conditions).

### Inclusion criteria

This review encompasses Ayurvedic texts available in both printed and electronic formats.

### Exclusion criteria

*Samhita*, *Nighantu*, and *Rasagranthas*, which are available in the manuscript form, were excluded from the present research study.

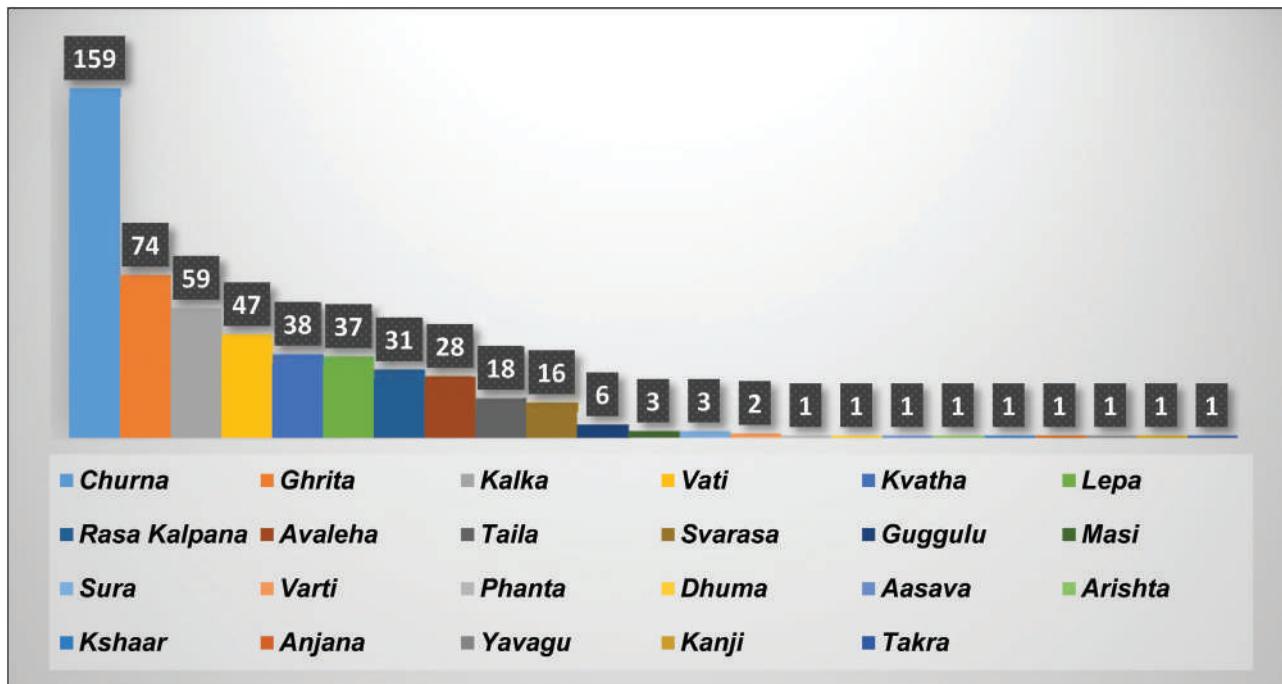

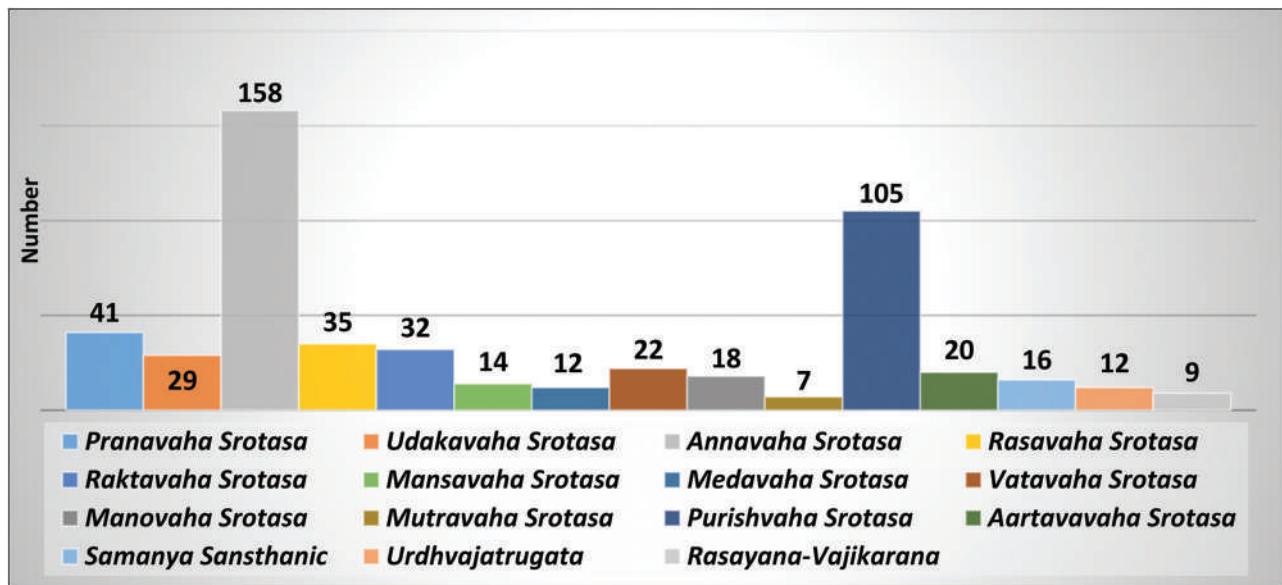

### Methodology

The data are systematically presented in a precise tabular format, detailing the indications for various disease conditions. Texts containing information related to *Dadima* were considered to be the source material. Repetition of a single formulation noted in more than one text was considered one.

## Result and Discussion

### Formulation containing *Dadima* as an ingredient

Out of 530 medicinal formulations, the majority are in *Churna* form (159), followed by *Ghrita* (74), *Kalka* (59), *Vati* (47), *Kvatha* (38), *Lepa* (37), *Rasa Kalpana* (31),

Figure 1: Dosage form of *Aushadha Kalpana*Figure 2: *Aushadha Kalpana* (medicinal formulations) of *Dadima* in diseases of different *Srotas*

*Avaloha* (28), *Taila* (18), *Svarasa* (16), *Guggulu* (6), *Masi* (3), *Sura* (3), *Varti* (2), *Phanta* (1), *Dhuma* (1), *Asava* (1), *Arishta* (1), *Kshaar* (1), *Anjana* (1), *Yvagu* (1), *Kanji* (1), and *Takra* (1) [Figure 1].

The majority of the formulations are indicated in diseases of *Annavaha Srotas* (158), followed by *Purishvaha* (105), *Pranavaha* (41), *Rasavaha* (35), *Raktavaha* (32), *Udakavaha* (29), *Vatavaha* (22), *Aartavavaha* (20), *Manovaha* (18), *Samanya Sansthanika* (16), *Mamsavaha*

(14), *Medovaha* (12), *Urdhvajatrugata* (12), *Rasayana-Vajikarana* (9), and *Mutravaha Srotas* (7) Figure 2 wise classifications of *Dadima* containing *Aushadha Kalpana*.

### 1. *Pranavaha Srotasa*

Among the 41 formulations indicated in *Pranavaha Srotasa*, 22 formulations have been indicated in *Kasa* (cough), seven in *Shwasa* (asthma), six in *Rajyakshma* (tuberculosis),

three in *Udavarta* (improper movement of *vata*), and one in *Hikka* (hiccup). *Churna* (18) is the commonest dosage form, followed by *Vati* (8), *Ghrita* (3), *Avaleha* (3), and *Guggulu* (2). One *Churna* formulation is recommended for external application in the management of *Pinasa* (rhinitis), while a *Vati* formulation is prescribed for both internal and external use in the treatment of *Kasa* (cough) [Table 1].

## 2. *Udakavaha Srotas*:

Among the 29 formulations indicated in *Udakavaha srotas*, nine formulations are indicated in *Udararoga* (ascites) and seven in *Trishna* (thirst due to *pitta*) administered internally. *Churna* (11) is the most common dosage form, followed by *Avaleha* (2). For external application, *Lepa* (9), *Kalka* (3), and *Churna* (1) are indicated in *Trishna* [Table 2].

### 3. *Annavaha Srotas*:

Among the 158 formulations indicated in *Annavaha srotas* disease, 32 formulations are indicated in *Gulma* (abdominal lump), 31 in *Grahani*, 26 in *Aruchi* (anorexia), 20 in *Shoola* (colic pain), 14 in *Ajeerna* (indigestion), 10 in *Agnimandya* (digestive impairment), 8 in *Chardi* (emesis), six in *Krimi* (worm infestation), and three in *Amlapitta* (hyperacidity). *Churna* (60) is the most common dosage form, followed by *Ghrita* (25), *Vati* (15), *Kalka* (15), *Rasa Kalpana* (13), *Avaloha* (10), and *Kvatha* (8). For external use, seven formulations are indicated in *Aruchi* and one in *Shoola*. *Kalka* (5) is the most common dosage form [Table 3].

### 4. *Rasavaha Srotas*:

Among the 35 formulations used in *Rasavaha srotas*, 14 are indicated in *Hridroga* (heart diseases), followed by six

in *Jvara* (fever), three in *Pandu* (anemia), and one each in *Kshata-ksheena* (thoracic trauma), *Kshaya* (consumption), and *Palita* (graying of hair). *Churna* (12) is the maximum dosage form, followed by *Ghrita* (5), *Vati* (3), and *Rasa Kalpana* (2). Five formulations are indicated in *Jvara* and four in *Palita* for external use. *Lepa* (5) and *Taila* (2) are the most common dosage forms [Table 4].

### 5. *Raktavaha Srotas*:

Seven formulations are indicated in *Raktapitta* (bleeding due to *pitta*), two in *Daha* (burning sensation), and one in *Nasagata Raktapitta* (epistaxis). *Churna* (4), *Ghrita* (3), and *Kvatha* (2) are the most commonly mentioned dosage forms. Among the formulations indicated for external application, seven formulations are indicated in *Daha*, five in *Nasagata Raktapitta*, four in *Masurika* (smallpox), three in *Tvaka vaivarnyata* (skin discoloration), and one each in

*Kushtha* (integumentary disease), *Rakta pitta*, and *Visharpa* (erysipelas). *Lepa* (10) is the most common dosage form, followed by *Svarasa* (5), *Kalka* (3), and *Kvatha* (2) [Table 5].

#### 6. *Mamsavaha Srotasa*:

Among the different formulations indicated externally in *Mamsavaha Srotas* diseases, four formulations are indicated in *Upadamsha* (syphilis), two in *Bhagashotha* (inflammation of the female genital), two in *Lingaviddhi* (penile

enlargement), two each in *Vrana* (wound) and *Kunakha* (paronychia), and one each in *Phiranga* (syphilis) and *Talushosha* (atrophy of the palate). *Lepa* (7) and *Churna* (4) are the most commonly mentioned dosage forms [Table 6].

#### 7. *Medovaha Srotas*:

Among the 12 formulations, ten (10) are indicated in *Prameha* (diabetes mellitus) for internal use. *Rasa Kalpana* (4) and *Ghrita* (3) are the most commonly mentioned dosage forms. Two

formulations are recommended for external application, in the form of *Lepa* in *Medoroga* (obesity) [Table 7].

#### 8. *Vatavaha Srotas*:

For internal administration, 12 formulations are indicated in *Vatavyadhi* (disorder due to *vata*) and three each in *Amavata* (rheumatism due to *ama*) and *Apatantraka* (convulsive fit). *Churna* (5) and *Vati* (4) are mostly mentioned forms, followed by *Ghrita* (3) and *Guggulu* (3). Two formulations are indicated in

*Vatavyadhi* and one in *Vatarakta* (rheumatism due to *rakta*) in the form of external application. *Taila* (3) is the commonly used dosage form. One *Taila* formulation is indicated in *Vatarakta* for internal and external administration [Table 8].

#### 9. *Manovaha Srotas*:

Among the 18 formulations, five are indicated each in *Madatyaya* (alcohol abuse) and *Unmada* (insanity), four in *Apasmara* (epilepsy), three in *Murcha* (syncope),

and one in *Madhyajeerna* (indigestion due to alcohol) for internal administration. *Ghrita* (9) is the mostly mentioned form, followed by *Svarasa* (3) and *Kalka* (3) [Table 9].

#### 10. *Mutravaha Srotas*:

Among the formulations used in *Mutravaha Srotas*, four formulations are indicated in *Mutraghata* (urinary retention) and three in *Mutrakriccha* (dysuria). *Kalka* (4) is the most commonly mentioned dosage form [Table 10].

#### 11. *Purishvaha Srotas*:

Among 105 formulations used, 75 are indicated in *Atisara* (diarrhea), 11 in *Arsha* (piles), 8 in *Vibandha* (simple constipation), 3 in *Parikartika* (fissure-in-ano), 2 each in *Pravahika* (dysentery) and *Gudabhramsha* (rectal prolapse), and 1 in *Bhagandara* (fistula-in-ano) for internal administration. *Churna* (25) is the most frequently used dosage form, followed by *Kvatha* (21), *Kalka* (15), *Vati* (9), *Ghrita* (7), *Avaleha* (7), *Rasa Kalpana* (7), and *Svarasa* (5). Externally, two formulations are indicated in *Visuchika* (acute gastroenteritis) and one each in *Atisara* and

*Gudabhramsha, Lepa, Kalka, Anjana, and Vati* are the dosage forms used for external application [Table 11].

#### 12. *Aartavavaha Srotas*:

For internal administration, three formulations are indicated each in *Asrigdara* (menorrhagia) and *Yoniviyapada* (gynecological disorder); two each in *Bandhyatva* (female infertility), *Somaroga* (leucorrhoea), and *Sutika roga* (puerperal disorder); one in *Garbhaprada* (conception) and one is indicated for its use as a *Garbhapataka yoga* (formulations for miscarriage). *Ghrita* (6) is the most commonly mentioned dosage form, followed by *Churna* (2), *Kalka* (2), and *Rasa Kalpana* (2). For external use, two formulations are indicated in *Yoniviyapada* and one each in *Garbhashoola* (pain due to the fetus) and *Sutika roga*. One formulation is indicated for its use as a *Garbhapataka yoga*. *Taila* (4) is the maximum dosage form. One *Ghrita* formulation is indicated in *Yoniviyapada* for both internal and external use [Table 12].

#### **Formulation containing *Dadima* indicated in *Samanya Sansathanika Vyadhi***

Four formulations are indicated each in *Balaroga* (pediatric health care) and *Visha Chikitsa* (toxicology), two each in *Sarvaroga* (all disease) and *Vata-kaphaja Vikara* (disease due to *vatakapha*), and one each in *Pittaja Vyadhi* (disease due to *Pitta*) and as *Shramhara* (reliever of fatigue). *Ghrita* (5) is the most commonly mentioned dosage form, followed by *Churna* (3), *Kvatha* (1), and *Kalka* (1). Externally, one *Kalka* formulation is indicated in *Visha Chikitsa*. One *Ghrita* formulation is indicated in *Visha Chikitsa* for both internal and external use [Table 13].

#### **Formulations containing *Dadima* indicated in *Urdhvajatrugata Vyadhi* (suprACLAVICULAR diseases)**

Twelve formulations are indicated for its external use in the diseases of *Urdhvajatrugata Vyadhi*. Five formulations are indicated each in *Dantagata Roga* (dental disorder), with two each in *Mukharoga*

(aphrodisiac) with *Churna* (4), *Ghrita* (2), and *Vati* (2) as the dosage forms [Table 15].

Ayush *Ahara* and nutraceuticals are closely related concepts, particularly in the context of India's traditional systems of medicine and modern health practices. Ayush *Ahara* includes a range of natural foods and herbs believed to have therapeutic properties. These foods are often rich in nutrients and bioactive compounds that support various bodily functions, such as digestion, immunity, and mental clarity.

Nutraceuticals can be defined as a food or a part of food that provides medicinal or health benefit including prevention and treatment of disease, and fruits have also been considered to be nutraceuticals as they help in treatment of many diseases along with their nutritive values.<sup>[88]</sup>

Pomegranate is a nutrient-dense fruit renowned for its exceptional health benefits, making it a powerful addition to a balanced diet. Rich in essential vitamins such as vitamin C and K, B vitamins, and minerals such as potassium, iron, and magnesium, pomegranate supports immune function, heart health, and overall wellbeing. It is also a potent source of dietary fiber and antioxidants, particularly polyphenols such as flavonoids and tannins, which help combat oxidative stress and inflammation.<sup>[89]</sup>

Classical Ayurvedic texts extensively highlight the medicinal value of *Dadima* (pomegranate), which shows its dual role as both a nourishing food and a potent natural remedy. *Dadima* is approved of not only for its rich nutrient profile but also for its therapeutic properties. In this regard, it can be aptly classified under Ayush *Ahara*, symbolizing a combination of diet and medicine in the Ayurvedic tradition.

## Conclusion

In conclusion, this review highlights the profile of *Dadima*, with the therapeutic indications mentioned in

Ayurveda classics. Among the 530 reported medicinal formulations, *Churna* is the most frequently used dosage form. *Dadima* is extensively prescribed for conditions related to *Annavaha Srotasa* and *Purishvaha Srotasa*. It is also indicated for generalized disease conditions, *Urdhvajatrugata Vyadhi*, *Rasayana*, and *Vajikarana*. Regular consumption of *Dadima* can support immune function, reduce the risk of chronic diseases, and contribute to a balanced and nutritious diet. As a delicious and healthy food choice, *Dadima* can be used as an Ayush *Ahara* and should remain a cornerstone of dietary recommendations and public health strategies.
